

World Happenings In Pictures

TALLY-HO!—Main obstacle jump by 133 horses takes place as Bill Bayler guides 133 of them, stabled under the hood of his pickup truck, over a hazard during a foxhunt at Charlottesville, Va. Bayler says that his own steady appearance checked the four-legged thoroughbreds at between 40 and 60 miles per hour during the course of the hunt.

VICE-ADMIRAL E. R. Manegly, right, Chief of Naval Staff, Halifax, Nova Scotia, during a recent week. With him are Rear-Admiral R. E. A. Bulwin, Atlantic Coast Commandant, and the Quebec's captain, E. W. Flack-Noyes. The ship will enter service next spring.

MAGNIFICENT CLEAN-UP IN PUERTO RICO—Soldiers from the Canadian aircraft carrier HMCS Magnificent work on the bow of ship during clean-up in San Juan, Puerto Rico. The carrier is on a training cruise.

ALDERMAN Harry V. Ward, Mayor of Chicago, holds a large British national on "Marengo" brand, collected during a recent trip to South Africa to represent Britain in the world frog jumping championships.

NEW SHIP—The sleek modern vessel above is the Canadian Pacific Steamship new Empress of Britain, which will take the place of her predecessor sunk during World War II. Queen Elizabeth will displace the 22,000-ton liner in June at commission on the River Clyde in Scotland. The ship will enter service next spring.

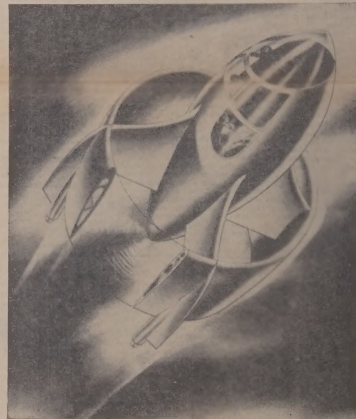

DESIGNED FOR FOLD VICTIMS—Designed for use by nearly paralyzed police victims who still have control of neck and hand muscles, the mechanical chair pictured above in the development of Ed Tilden, Alton, Ill., instrument panel before the patient's face was so activated by a stick held in the mouth, protruding rod is now operated, controls forward-reverse motion of chair. Redwood of aircraft parts mechanism is powerful enough to pull portable chest respirator as well as patient, as modeled by Mrs. Richard Tilden.

BRITAIN'S supersonic aerobatic team plays today the leader as they practice for the fifth international air display in Holland May 20. The three planes are Hawker Hunter jets.

MRS. AMERICA Dismore, 25, of Lincoln, Neb., poses at Miami Village, Fla., after being crowned "Mrs. America 1950". Measure of five, she is five feet, five inches tall, weighs 140 pounds, has a firm measurement of 36-36-36. Some 15 thousand dollars worth of prizes, including a trip to Europe, are hers together with title.

NEW TYPE PLANE—This is the newest craft of the Air Corps, or "Flying Barrel". It houses fuselage and power plant in a circular wing for increased performance. The plane is reported to have revolutionary helicopter-like characteristics, and the plane is under construction in France. This is an artist's conception of the plane.

A BALLERINA SWIN NICE in cotton nylon is treated with a dry good. Fashioned by Sue Nymph, it has inner boning and a full lined top.

SWEET-TOOTH PASTE—Putting the squeeze on the latest breakable candy bar—just is a lollipop-like bite is Richard Pennick, of East Cleveland, Ohio. The new product comes just as efficiently as old-fashioned Jergs pills, to judge from Richard's face.

TIMMERMAN'S 800 "Timberlock" Jones build the interlocking blocks of lumber after cutting down the Pines at Chicago, Ill., with a 400-ton saw. Time for the Chicago Club is 40 years. Last year the 100-ton saw was 400-ton saw. 400-ton saw performance was 400-ton saw. 400-ton saw performance was 400-ton saw.

CORNY, BUT NICE—Synthetic material with corn fiber as its base is what these ballerinas are modeling in Paris, France. The sparkling cloth is to show you that the material is waterproof, and the manufacturer claims that garments fashioned from the new fibre are also warm as wool, soft as cashmere.

Heavier supplies, lower hog prices during first four months of 1955

First road in Canada was a one-mile route built by Champlain in 1606

The problem of roadbuilding is as old as the history of civilization. The Chinese, Cortes, Incas, Incas of Peru and the Romans built roads that are still in partial existence today. The first road in Canada was a one mile route built by Champlain at Port Royal, Nova Scotia in 1606.

The latter half of the 17th century and early 18th century saw the growth of Quebec City to neighboring communities. During the same period the Beignets built their own roads about 100 ft. Lawrence as far as the Ottawa river.

In 1720, a young lawyer from Paris, Guillaume LeMoine, obtained a monopoly to carry passengers and mail between Quebec City and Montreal and built a roadway to the latter city. This road is still the main highway along the north shore of the St. Lawrence.

De Rouville was appointed "grand voyeur" to look after the first roads of the province. The first road he built was the Ottawa road, which he built to connect the Ottawa and the St. Lawrence.

De Rouville was appointed "grand voyeur" to look after the first roads of the province. The first road he built was the Ottawa road, which he built to connect the Ottawa and the St. Lawrence.
